

One-stop service - world-class, worldwide

Environmental Safety

Eurofins Agroscience Services

With over 30 years of experience in Crop Protection, Eurofins Agroscience Services is a global CRO offering exceptional technical knowledge, testing and regulatory consultancy to plant health and crop protection manufacturers, the agri-tech sector, plant breeders and the seed industry.

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of the agrochemical registration process.

An international team of ecotoxicology and environmental chemistry experts provide a complete Environmental Safety solution

With comprehensive knowledge of laboratory and field studies, our scientists work together to respond quickly, using the most current approach to complex, in-depth environmental studies.

Agrochemicals have helped to multiply food production over the last century in order to keep up with the needs of a growing population and to provide food security for as many people as possible. This responsibility will continue to fall to the food producing industry and associated industries for years to come.

However, this must be achieved in a sustainable way – the short and long-term impacts of agrochemicals in terrestrial and aquatic ecosystems and also their effects on humans have to be investigated and reduced to a minimum.

We focus on the fate and behaviour of substances and formulations in environmental systems, on their bioavailability, assimilation in organisms, as well as biological responses of these organisms, and on their subsequent fate in the environment.

Ultimately, Eurofins Agroscience Services is able to provide a full range of Terrestrial and Aquatic Ecotoxicology studies including Environmental Fate in laboratory and field as well as Ground Water Monitoring programs.

Expertise

As an international Group, we are proud to be able to claim some of the industry's most reputable names in ecotoxicology.

We provide competent, flexible and experienced services worldwide with all ecotoxicological studies performed in compliance with international guidelines, including EPA, OECD, EPPO, OPPTS, SETAC, IOBC and JMAFF.

Our Promise

As a global service provider, Eurofins Agroscience Services can promise unparalleled expertise in ecotoxicology. Our commitment to excellence in ecotoxicology is underlined by:

- Experienced and dedicated professionals with specific areas of expertise
- Project Management from the industry's most respected individuals
- Commitment to Growth and a vision of expansion for the future

Portfolio of Capabilities

The following service guide details some of our primary activities but is not exhaustive.

- Aquatotoxicology including analytics
- Microbiological testing
- Standard tier testing with NTA and soil organisms
- Aged residue and semi-field
- Honey bee lab, tunnel and field
- Bumble bee lab and greenhouse
- Predatory mite field studies
- Residues in food sources, bee products, earthworms and on terrestrial arthropods
- Non target plants, greenhouse and higher Tier
- Large scale NTA studies
- Monitoring
- Earthworm field studies
- Micro-arthropod field studies

Eurofins Scientific

Eurofins Scientific, through its subsidiaries, provides Contract Research Services to a wide range of industries including environment, pharmaceutical and agroscience.

Worldwide excellence in bio-analytical testing
