Sample	Research-/ordernumber:	Date sampling:	Date report:	
	737637/003984356	21-12-2016	09-01-2017	
	Test code:	Receiving date:	Sample was taken by:	Contactperson sampling:
	709	22-12-2016	Third party	Emile Hartman: 0652002125

Results	Test number	737637	737638
	Sample identification	Verhitter Vuil	Verhitter Schoon
	Germinationcount 22°C cfu/ml	4600	111
	Total fungi cfu/ml	10 **	3 **
	Yeast+fungi cfu/ml	70 **	3 **

Abbreviations:
ml : milliliter (1 ml = 1 thousandth liter)
cfu: colony forming units
** *Result is an indicative value.*

Explanation	Target values after disinfecto:		
	Germination count	< 500	cfu/ml
	Fungi	< 25	cfu/ml

If the values after disinfection exceed the above mentioned targets we recommend you to take a new sample and contact your supplier.

Method	Germinationcount 22°C	Q	KOL-22 Cf NEN-ISO 6222
	Total fungi		Em:MBL1
	Yeast+fungi	Q	GISTSCHIM Cf ISO 7954(87)

Q Method accredited by RvA
Em: Method Eurofins Agro, Gw: Equivalent of, Cf: In conformity with
All procedures have been completed within the maximum shelf life between sampling and analysis.
