

One-stop service - world-class, worldwide

Vector Control

Eurofins Agrosience Services

With over 30 years of experience in Crop Protection, Eurofins Agrosience Services is a global CRO offering exceptional technical knowledge, testing and regulatory consultancy to plant health and crop protection manufacturers, the agri-tech sector, plant breeders and the seed industry.

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of the agrochemical registration process.

Mosquito-borne diseases are responsible for over 1 million deaths annually, our children are especially vulnerable. To improve quality of life, to mitigate vector-borne diseases, to save lives, the World needs mosquito control.

In recent years, there has been an increasing awareness in terms of public health and vector control. The only methods to reduce the transmission of mosquito-borne diseases are to control vector species and to protect ourselves against mosquito bites.

Eurofins Agrosience Services can help

We are experts in providing product development, consulting and technical support to the professional pest control, public health and animal health pest control products and biocide industry.

Our Credentials

With over 20-years' experience in product development for vector control products, our professionals use standard protocols, field notebooks and SOPs to facilitate a consistent approach in managing external programs.

One-stop service - world-class, worldwide

An in-house quality assurance group performs all aspects of GLP training and audits, ensuring standardized and reliable performance group-wide. Highly trained field investigators with broad experience and expertise manage in-house field and laboratory studies conducted against a wide range of mosquito species.

Main locations for vector control studies are:

- USA
- Australia
- Thailand

Other locations are available.

Eurofins Agrosience Services can partner with local CRO's or government-funded research institutes and offer global study directorship for countries without OECD GLP; we project manage all studies and trials placed in the country.

With unparalleled global coverage, studies are carried out in Northern and Southern hemispheres to shorten product development timelines, giving you significant cost savings.

Our testing capabilities

- Lab phase I formulation screening: USA, Australia
- WHO resistance monitoring: USA, Australia, and Thailand
- Indoor residual sprays: USA, Australia
- Indoor space sprays: USA, Australia
- Outdoor ground or aerial ULV sprays: USA
- Indoor or outdoor spatial repellency: USA, and Thailand
- Larvicide: USA

Our Commitment To You

- **Superb Quality**; studies will be developed, scoped and fulfilled according to clients' requirements
- **Timely Communication**; our clients should never have to be concerned how and when the study will be done

- **Accurate Delivery**; data and reports are prepared and submitted according to your project timeline
- **Responsible Service**; no data will be published or discussed without approval from a sponsor

If we may assist you with any of your product development needs, please do not hesitate to contact us.

Eurofins Scientific

Eurofins Scientific, through its subsidiaries, provides Contract Research Services to a wide range of industries including environment, pharmaceutical and agrosience.

Worldwide excellence in bio-analytical testing
