

One-stop service - world-class, worldwide

Home, Garden and Urban Health Services

Eurofins Agrosience Services

With over 30 years of experience in Crop Protection, Eurofins Agrosience Services is a global CRO offering exceptional technical knowledge, testing and regulatory consultancy to plant health and crop protection manufacturers, the agri-tech sector, plant breeders and the seed industry.

EAS provides home, garden and urban health services, conducting laboratory and field research in the development of products aimed at the consumer.

This includes products formulated for the home and garden market such as ornamentals and turf (biostimulants, insecticides, herbicides, fungicides) as well as urban pest management (insecticides, termiticides, repellents).
