

One-stop service - world-class, worldwide

Avian Safety Assessment Services

Eurofins Agroscience Services

With over 30 years of experience in Crop Protection, Eurofins Agroscience Services is a global CRO offering exceptional technical knowledge, testing and regulatory consultancy to plant health and crop protection manufacturers, the agri-tech sector, plant breeders and the seed industry.

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of the agrochemical registration process.

Avian Safety Assessment Services

Originally established in 1976 as Wildlife International, Eurofins Agroscience Services' avian laboratory has served as the world leader in avian safety studies for almost 50 years and has conducted more avian safety assessments than any lab in the world.

We offer full-scale ecotoxicology testing services including the design and conduct of customized acute, one and two generation reproduction and specialized safety assessments to evaluate pesticide hazard to avian species.

Since its founding, our Easton, Maryland facility has developed into the largest and most respected avian safety laboratory in the world, offering the full suite of required acute, reproduction, metabolism and residue studies, as well as custom designed investigations in non-traditional species to meet client-specific needs.

Bringing together global, multi-disciplined research capabilities with market-leading product development and technical support services to meet the regulatory needs of your business.

The Industry Leader in Avian Safety Assessments

Eurofins Agrosience Services' scientists are able to respond rapidly to requests for complex, in-depth safety assessment studies, whether laboratory, field or semi-field studies.

Our team of scientists work consistently in meeting the ever increasing and complex needs of diverse industries with innovation, flexibility and quality in the midst of a rapidly-expanding regulatory arena. They have unparalleled skill in performing avian acute, reproduction, metabolism and residue studies, as well as the ability to develop and conduct specialty studies designed to meet specific needs and regulatory requests.

Offering a full range of services needed for regulatory submissions, Eurofins Agrosience Services is the perfect partner for avian safety assessments needs:

Our Avian Safety Assessment Services include:

- Acute oral safety assessments - including sequential regulatory endpoints
- Sub-acute dietary safety assessments studies (including passerines)
- Acute oral and dietary pathogenicity and safety assessments for testing of biopesticides and microbial pesticides
- Pilot studies
- Reproductive studies
- Egg injection studies
- Multi-generational reproduction studies
- Food avoidance studies
- Hen Delayed neurological safety studies
- Residue and metabolism studies
- Studies to screen and test for potential endocrine effects
- Chemistry support

Our Avian Safety Assessment Services provide reliable, efficient and timely solutions to help you meet new and evolving regulatory requirements across the globe!

Eurofins Agrosience Services' scientists and regulatory specialists have decades of experience conducting the full suite of required acute and reproduction studies (radiolabeled and unlabeled), as well as custom designed investigations in both traditional and non-traditional species, such as:

- Northern bobwhite quail
- Japanese quail (coturnix)
- Mallard
- Zebra Finch
- Canary
- Chickens
- Pheasant
- Pigeons
- Partridge

Eurofins Scientific

Eurofins Scientific, through its subsidiaries, provides Contract Research Services to a wide range of industries including environment, pharmaceutical and agrosience.

Worldwide excellence in bio-analytical testing
